

Krill Tube

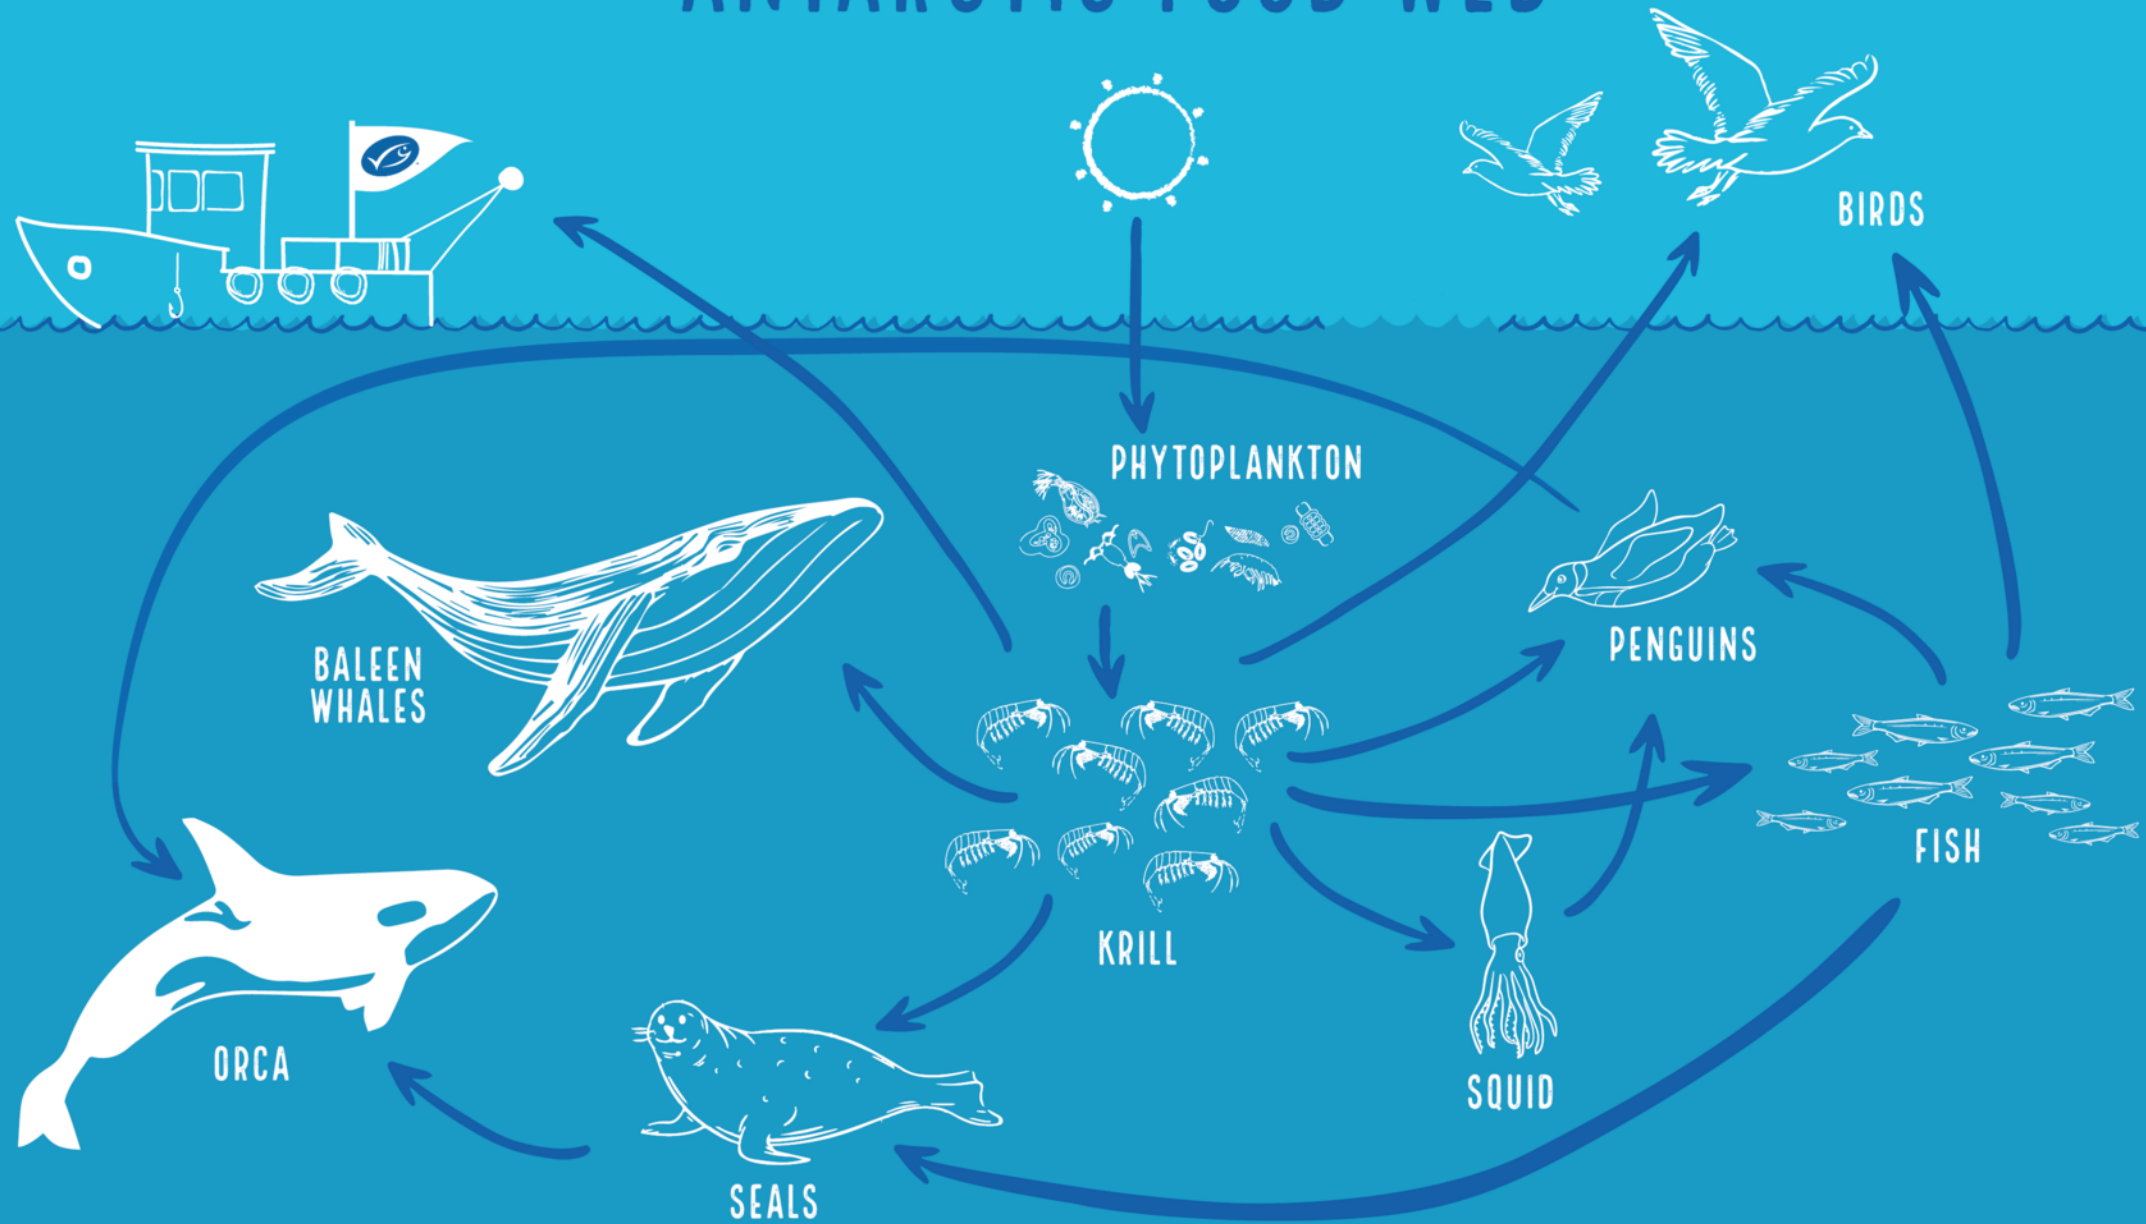

Krill

A large-scale photograph of a massive school of krill in the ocean. The krill are densely packed, creating a thick, reddish-brown cloud that fills most of the frame. The water is a deep blue, and the overall scene conveys the immense scale and density of these small marine organisms.

But none of them use Walrus
Nor on-chain payment

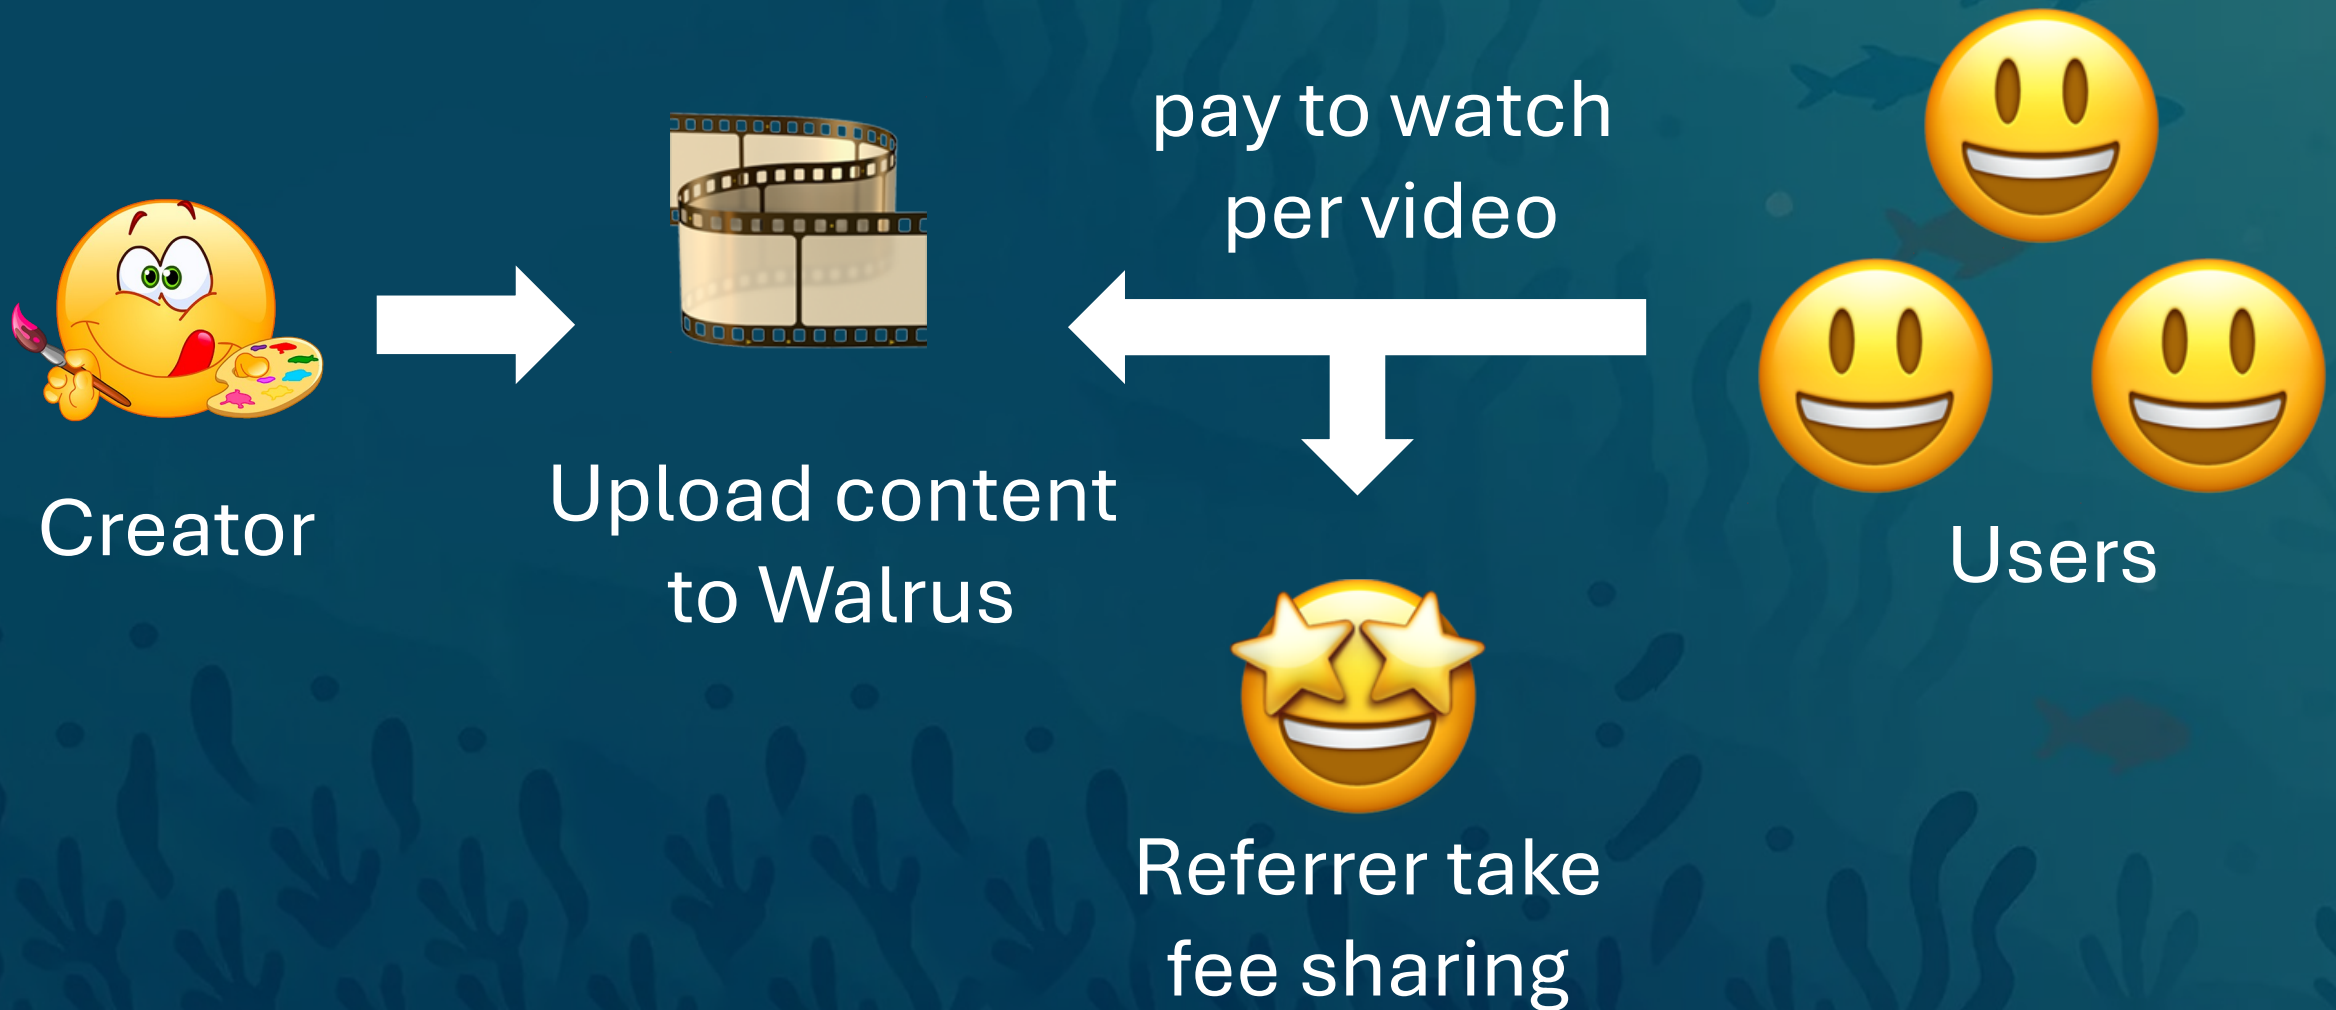

Why Krill Tube?

- Lower Platform Fee
- Settle payment on chain (SUI)
- Decentralized Storage on Walrus
Own your created content
- Flexible: Pay as you watch
- Revenue share: share fee with fan promoters on chain with smart contract logic

Platform	Platform Fee	Creator Gets
KrillTube	10%	up to 90%
YouTube	48–58%*	42–52%
Patreon	11–15%*	85–89%
Substack	13%*	87%
Fanfix	23%*	77%
OnlyFans	23%*	77%
Twitch	53 - 33%*	47–67%

* All competitor platforms include an additional ~3% credit card processing fee.

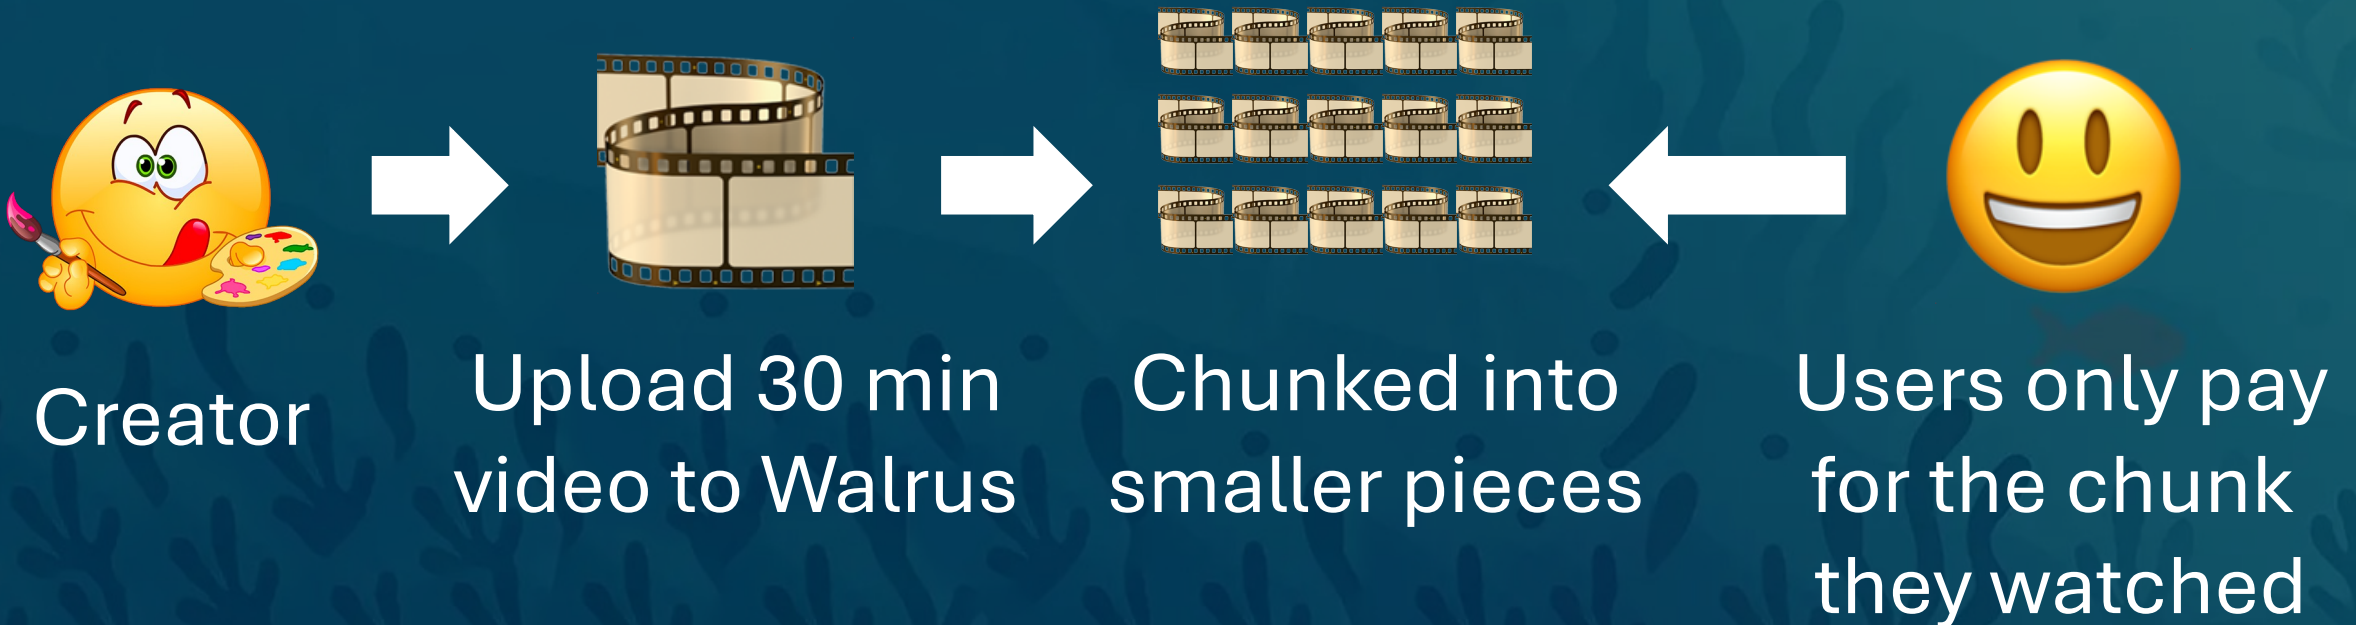

Revenue Sharing with Referrer By Smart Contract

Krill Tunnel Micro Payment

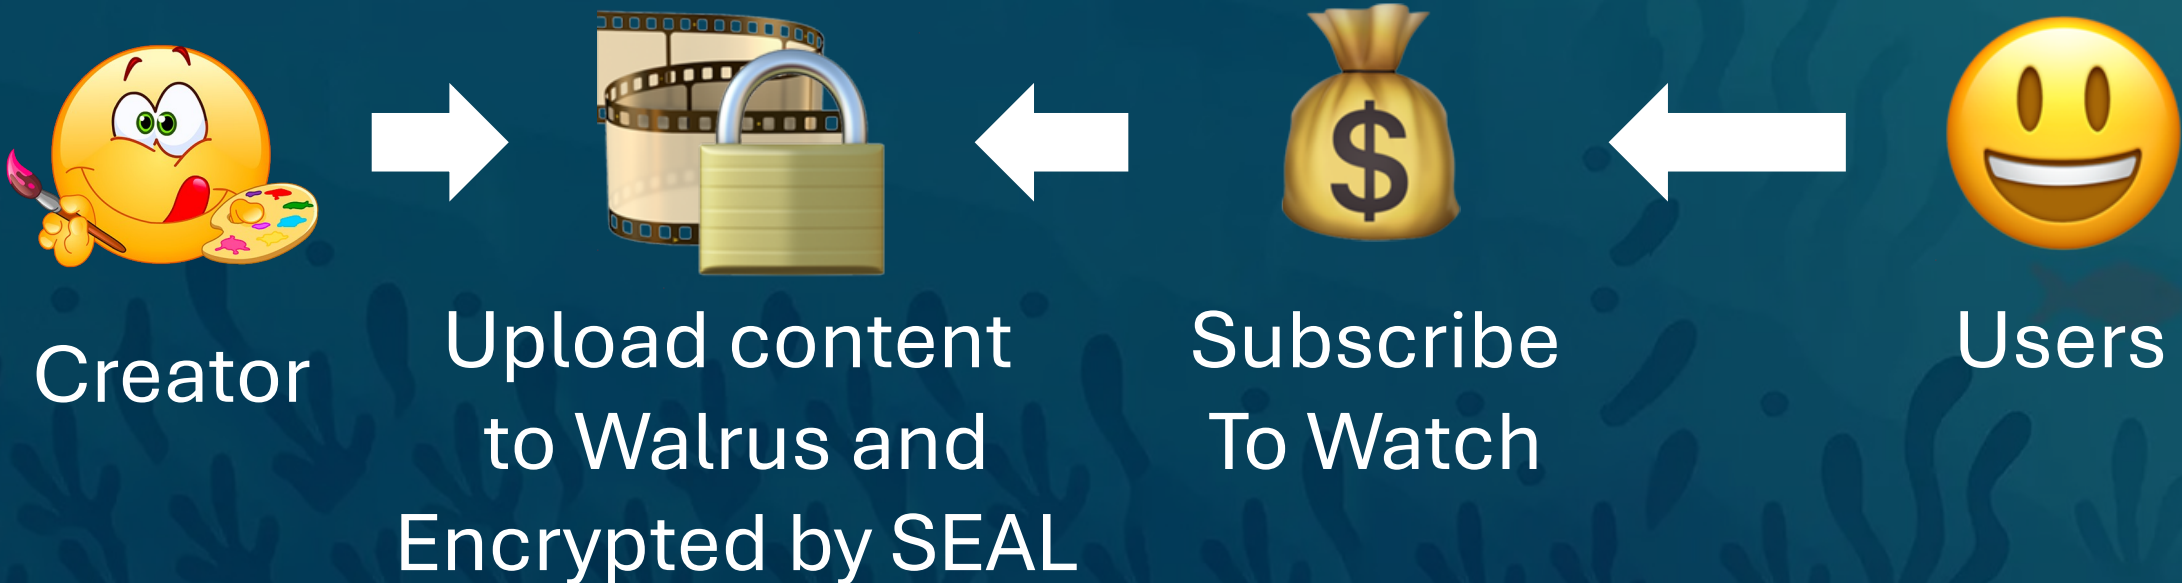

Pay as you watch

Tunnel is a move-based payment contract invented by Kostas in collaboration with Eason at Mysten Labs. It enables extremely granular per-segment payments and is now used by Mysten Labs for robot control and AI agent payment flows.

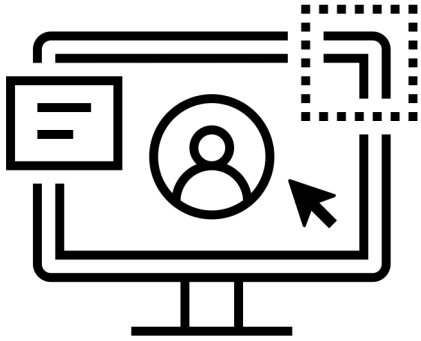

SEAL-powered subscription

In addition to purchasing access to individual videos through Tunnel, users can also pay Sui and use SEAL technology to unlock all content uploaded by a creator at once and enjoy unlimited viewing during the subscription period.
